Android 10

Android 10 system can accept more apk software

Android8

Android9

HD 8K Playback

Support video decoding in multiple formats

H.265
HEVC

HDR10+

Linux 1

Install the Linux operating system according to Develop the software you need for different purposes and usage habits.

Linux 2

The Linux system supports 8K video playback, Use a browser to surf the Internet

Linux 3

Linux system can switch desktop wallpaper according to your needs

Product Specification

Multiple interfaces facilitate connecting more devices

Supports Linux operating system, providing a rich ecosystem of applications and services. The device is designed for easy integration into various smart home and office environments, offering a seamless user experience. Its compact size and multiple interfaces make it a versatile choice for users looking to expand their device connectivity options.

Equipped with 4GB RAM, the device ensures smooth performance and fast data processing. It supports H.265 video encoding, enabling high-quality video streaming and storage. The device also features 8GB of storage space, providing ample room for applications, data, and media files. Its advanced H.265 support and large storage capacity make it an ideal solution for users who value high performance and data security.

Supports Linux operating system and WiFi 6, ensuring high-speed wireless connectivity. The device is designed to provide a stable and secure network connection, making it suitable for use in various environments. Its advanced WiFi 6 support and Linux-based system ensure that users can enjoy a fast and reliable network experience.
